I rate Compiler Construction: Principles and Practice to the same category as legendary Kernighan/Ritchie C Programming Language, Petzold's Programming Windows or Richter's Programming Server Side Applications for MS Windows 2000. <https://www.amazon.com/Compiler-Construction-Principles-Kenneth-Louden/dp/0534939724> Goto - Wikipedia GoTo (goto, GOTO, GO TO or other case combinations, depending on the programming language) is a statement found in many computer programming languages. It performs a one-way transfer of control to another line of code; in contrast a function call normally returns control. The jumped-to locations are usually identified using labels, though some languages use line numbers. Control flow - Wikipedia In computer science, control flow (or flow of control) is the order in which individual statements, instructions or function calls of an imperative program are executed or evaluated. The emphasis on explicit control flow distinguishes an imperative programming language from a declarative programming language.. Within an imperative programming language, a control flow statement is a statement ...
