Plus you'll meet colleagues across all science disciplines, all grade bands and teaching stages, from the newest teacher to the veteran administrator, who share a passion for science education.  
<http://www.nsta.org/publications/article.aspx> Aristotelian physics - Wikipedia Aristotelian physics is a form of natural science described in the works of the Greek philosopher Aristotle (384–322 BCE). In his work *Physics*, Aristotle intended to establish general principles of change that govern all natural bodies, both living and inanimate, celestial and terrestrial – including all motion, change with respect to place, change with respect to size or number ... Intuitive Concepts in Quantum Mechanics - Scriptural Physics To make interacting photons, the team shone a weak laser through a cloud of cold rubidium atoms. Rather than emerging from this cloud separately, the photons within the laser merged bound in groups of three. Emergence - Wikipedia *In philosophy, emergence is often understood to be a claim about the etiology of a system's properties. An emergent property of a system, in this context, is one that is not a property of any component of that system, but is still a feature of the system as a whole.* **BibMe: Free Bibliography & Citation Maker - MLA, APA ...** "The difference between the right word and the almost right word is the difference between lightning and a lightning bug."  
**The Concept of Information - Rafael Capurro** *The concept of information as we use it in everyday English in the sense knowledge communicated plays a central role in today's society. The concept became particularly predominant since end of World War II with the widespread use of computer networks.* **Answers - The Most Trusted Place for Answering Life's ...** *Answers.com is the place to go to get the answers you need and to ask the questions you want* **Hearst Magazines** *Subscribe now and save, give a gift subscription or get help with an existing subscription.* **Kirby Analytics - Home** *Source: Silver Institute. The Silver Institute tells us there were 735 million ozs. of Ag mined from the earth's crust in 2010. Simple math [735 / 80.4] tells us that "nature" is implying that the gold / silver ratio should be 9.14: 1.*
