 PART ONE: INTRODUCTION TO TRIAXIAL TESTING Prepared by Dr ... Test Procedure for CONSOLIDATED
 UNDRAINED TRIAXIAL COMPRESSION TEST FOR UNDISTURBED SOILS TxDOT Designation: Tex-131-E Effective
 Date: August 1999 1. SCOPE 1.1 This method determines the angle of internal friction (ϕ) and cohesion (c) strength
 parameters of soils by triaxial compression testing.

 This standard is issued under the ?xed designation D 4767; the number immediately following the designation indicates
 the year of original adoption or, in the case of revision, the year of last revision. Method for Consolidated Drained Triaxial
 Compression Test ... The shear strength of a saturated soil in triaxial compression depends on the stresses applied, time
 of consolidation, strain rate, and the stress history experienced by the soil. In this test method, the shear characteristics
 are measured under drained conditions and are applicable to field ... Standard Test Method for Unconsolidated-Undrained

 Method for Consolidated Undrained Triaxial Compression Test for Cohesive Soils* **Standard Test Method for
 Consolidated Undrained Triaxial ...** 1.1 *This test method covers the determination of strength and stress-strain
 relationships of a cylindrical specimen of either an intact, reconstituted, or remolded saturated cohesive soil. Specimens
 are isotropically consolidated and sheared in compression without drainage at a constant rate of axial deformation (strain
 controlled).* **AMERICAN SOCIETY FOR TESTING AND MATERIALS Reprinted from ...** *Standard Test Method for

 apparatus purchased by the Laboratory, Karol-Warner Model 541 Triaxial Tester, is of the stress controlled type. The test
 procedures for the CD and CU tests developed under this project also use this loading method.*
